

# Overview of UI

Area, need to draw background image, items, characters

Need descriptions for each area and any objects or people there

Need list of areas connected to the one you're currently in, could be direction, could be enter/exit a building

Need list of all people in the area and what they say based on game events

Need list of items that can be taken

Need list of items in possession and the ability to view or use them

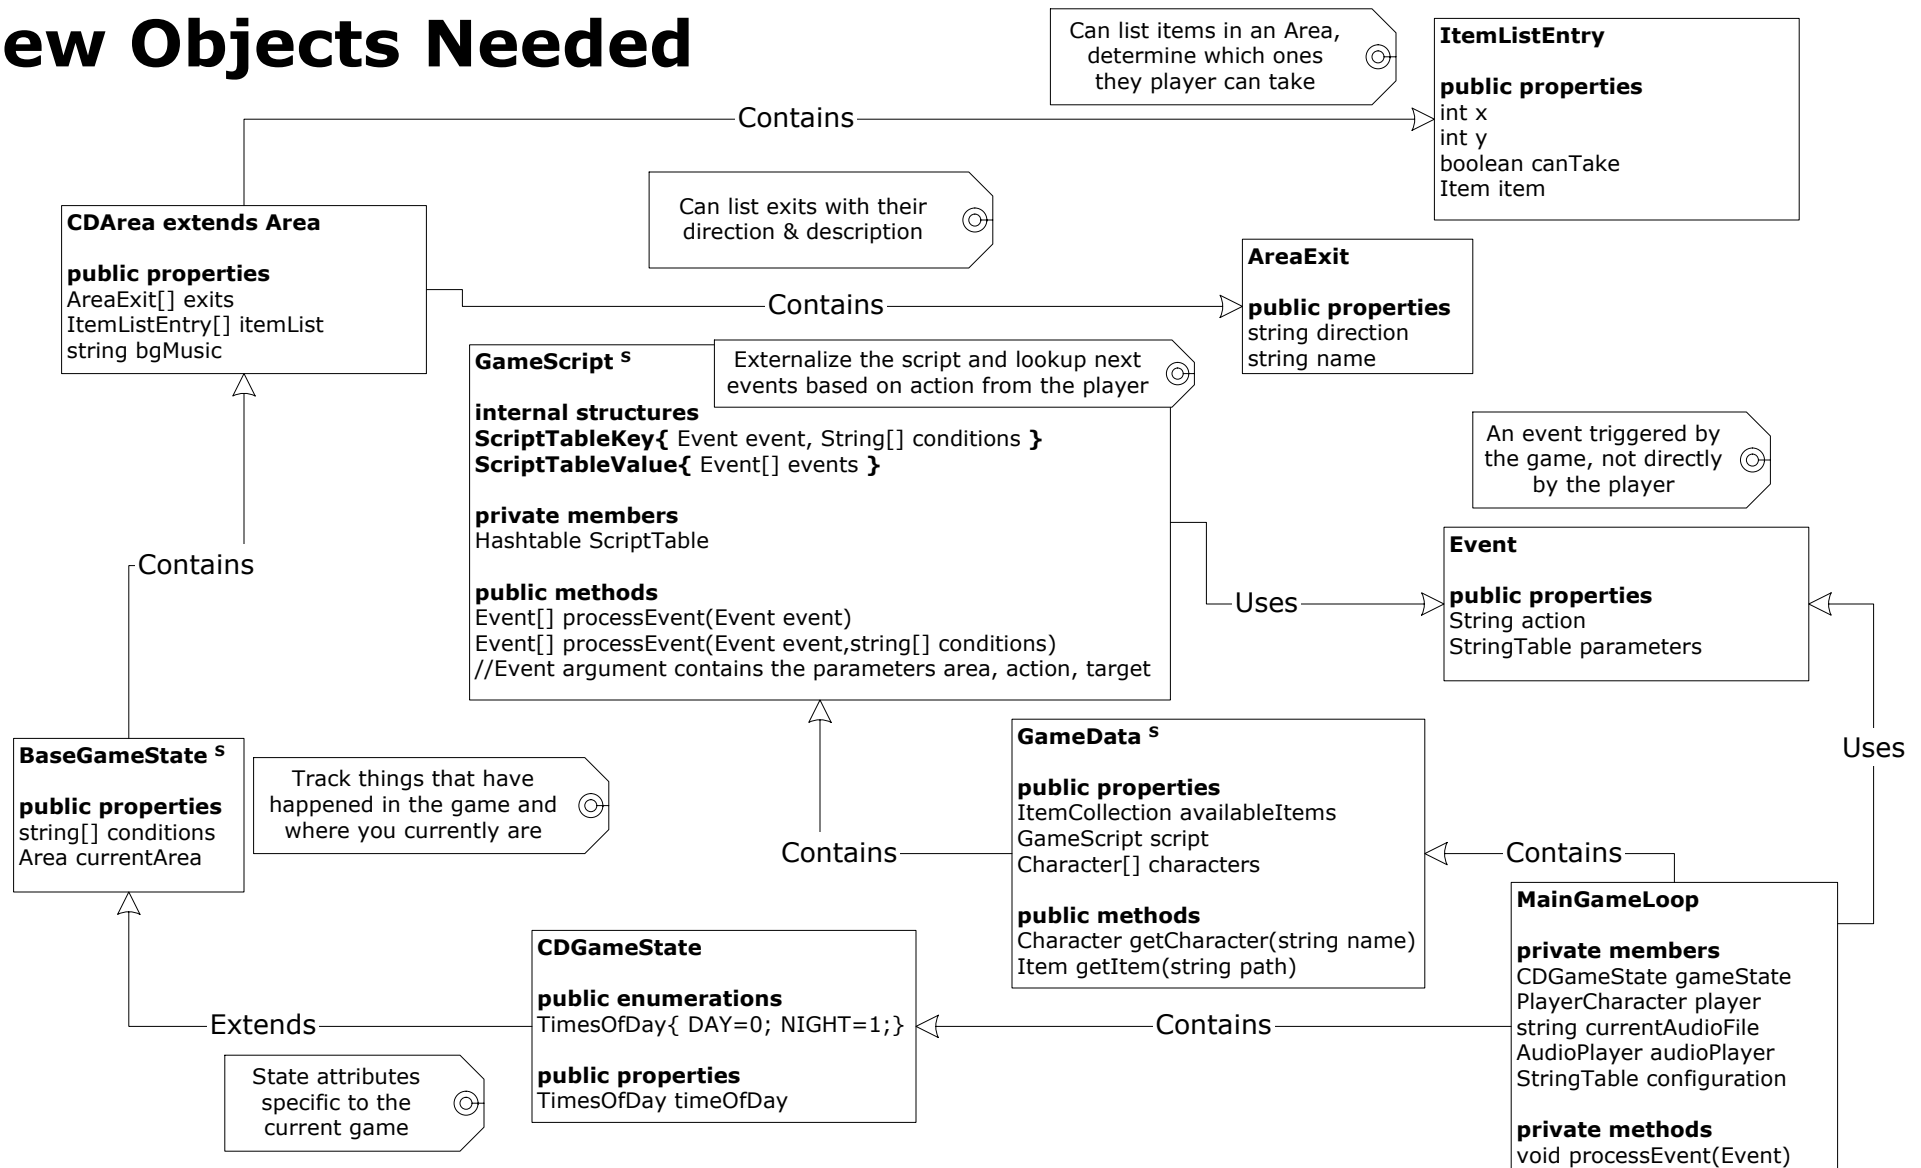

Enter name of state to save

Load existing state

Help and information

Description based on location, items, and people there

## New Objects Needed

## Random thoughts on game scripting

(Area+action+target+conditions)=(Results[1])

Possible results: add item, lose item, character moves, item moves, add condition, game routine, draw text, move player

So then results is (event,parameter) combination

```
Events[]=ProcessAction(Area,string,Object,String[])    Process each returned event
```

## What does lookup table look like?

### Player Initiated Event

Action	p[area]	p[target]	Conditions	Action	Parameters
Look	Camineet:EastSide	Area	null	DrawAreaText	"Description"
Talk	Parolit:Chuch	Priest	hasSomeItem	DrawDialog	"Dialog"
				AddItem	Item

### Resulting Game Events

# Actions

Look  
Move  
Talk  
Take  
Inventory  
Save  
Load  
Help

Bring up list of items, exits, and characters  
action="Look"  
target="item:item name" or "exit:exit name" or "area" or "character:name"

Bring up list of exits  
action="Move-Player"  
target="area:new area"

Bring up list of characters  
action="Talk"  
target="character:name"

Bring up list of items that can be taken  
action="Take"  
target="item:item name"

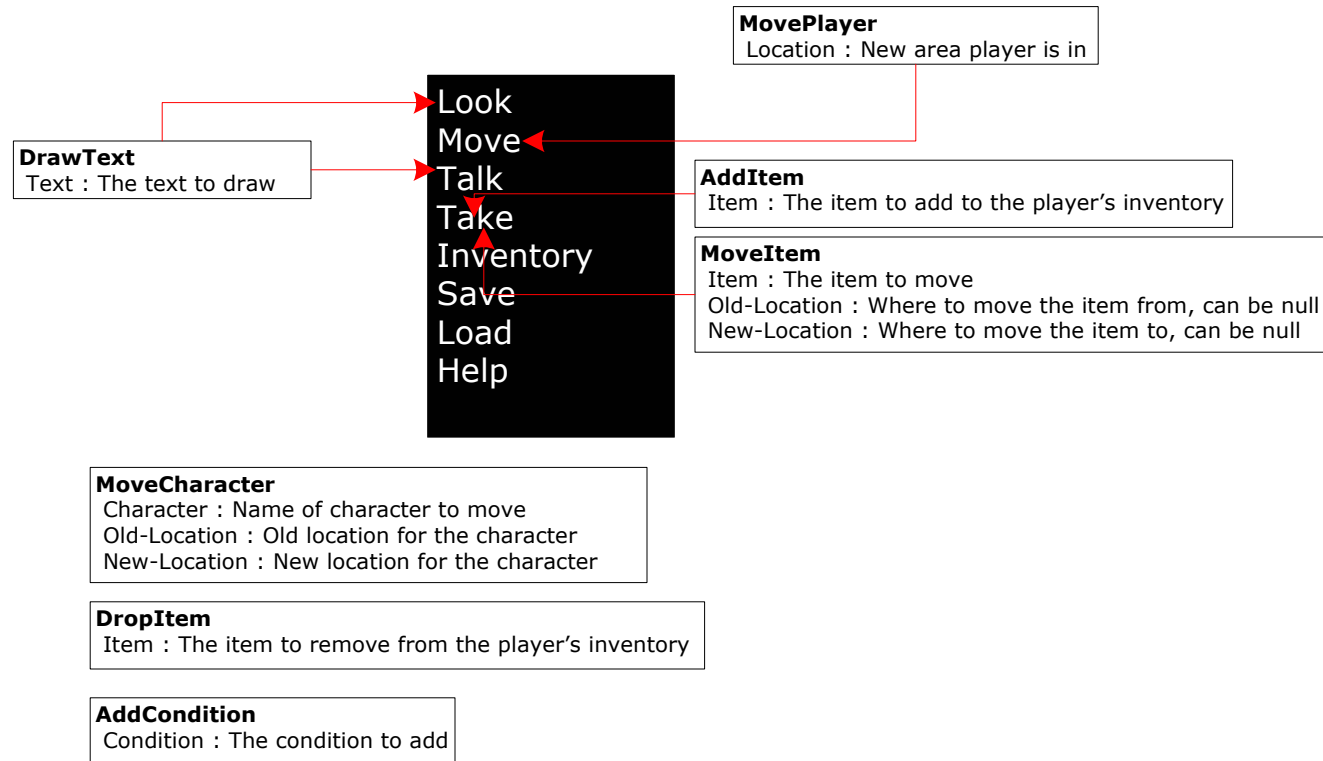

Bring up list of items the player has, select item, select use or look  
action="Look"  
target="item:item name"  
action="Use"  
target="item:item name" or "character:name"

Copy current game in progress to a zip file

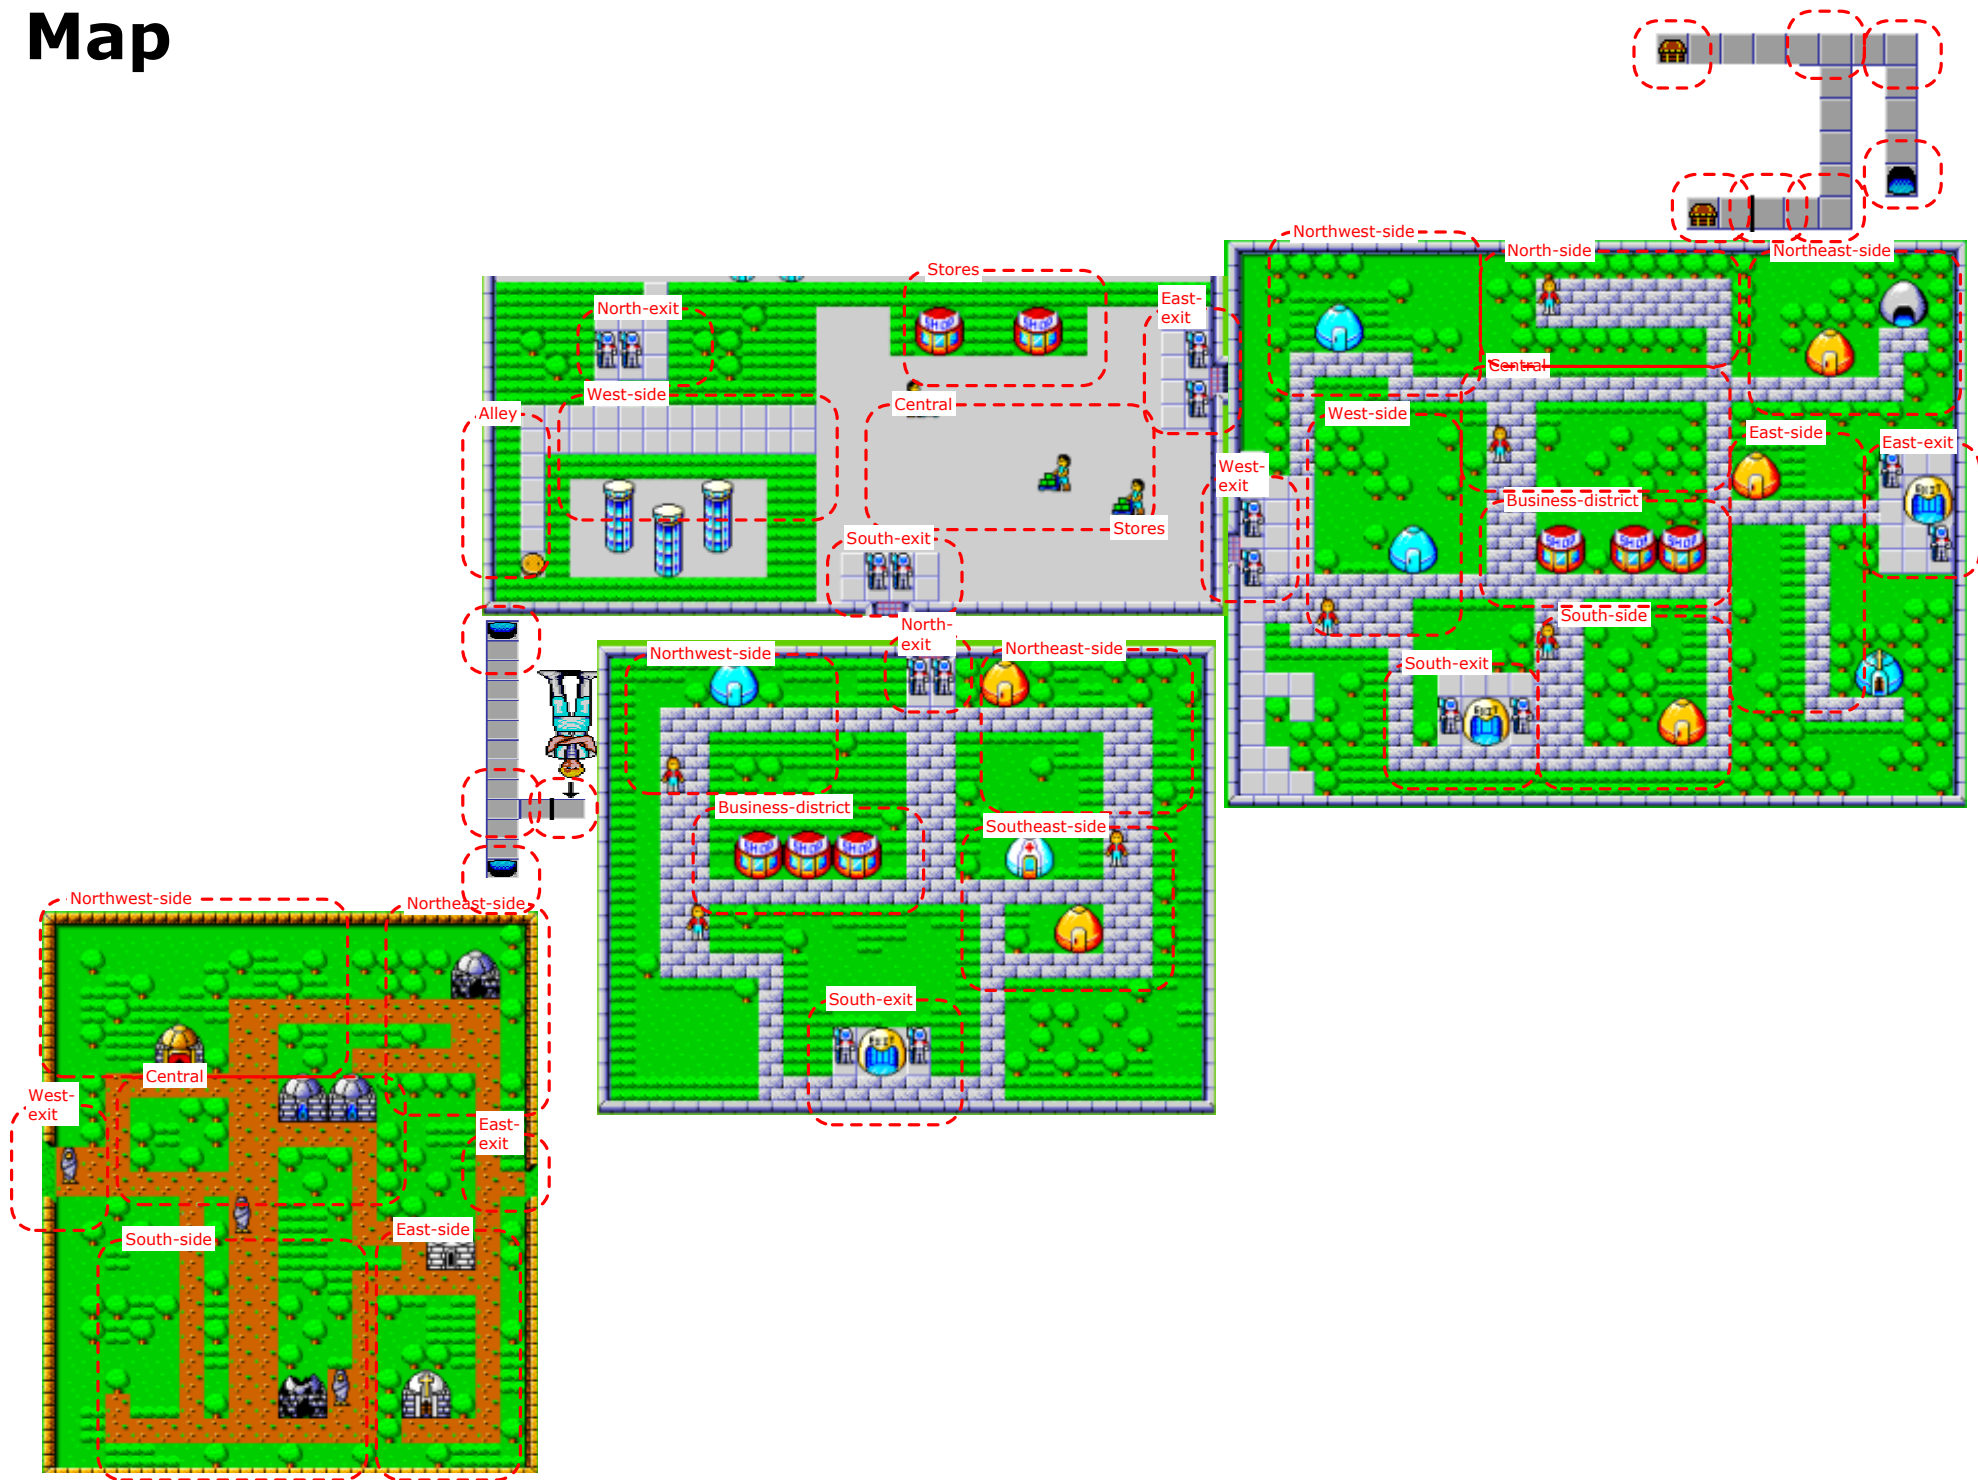

Load a saved game
